

GROUND FLOOR PLAN AND CEILING FAN LAYOUT • SCALE 1:50 • ALL DIMENSIONS IN FEET AND INCHES • DO NOT SCALE

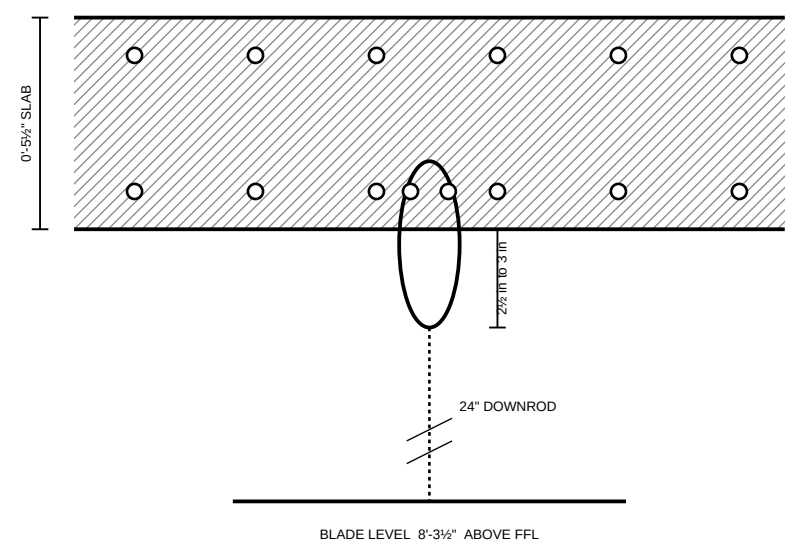

GENERAL NOTES

- 01 All dimensions are in feet and inches. Do not scale off this drawing.
- 02 This drawing is to be read with the architect's drawing ECS __/AR/R2 and the structural drawing STRUCTURAL WD-1.
- 03 Fixture positions are dimensioned to the centre of the fitting, from the inside faces of the north and west walls of the room concerned.
- 04 Clear slab soffit is 10'-6½" above ground floor finished floor level. There is no false ceiling. All luminaires and fans are surface mounted on the RCC soffit.
- 05 Where the first floor sunken slab lowers the soffit, the reduced level is given in the light point schedule on sheet 02. Confirm the sunken depth with the structural engineer before setting out.
- 06 Illumination design is to IS 3646 (Part 1) and NBC 2016 Part 8. Calculations on sheet 03.
- 07 Conduit: ISI marked medium gauge rigid PVC, laid between the top and bottom slab reinforcement, 20 mm dia for up to three 1.5 sq mm cores and 25 mm dia above that. Draw wire to be left in every run.
- 08 No conduit is to pass through any RCC beam. Route around through the slab panel or drop down the wall and rise again.
- 09 Fan hooks: 10 mm dia MS bar bent as a closed loop, hooked over two bottom mesh bars in each direction and tied at all four crossings, projecting 2½ in to 3 in below the soffit and capable of carrying 100 kg.
- 10 Junction boxes: 75 mm dia PVC, flush with the finished soffit. Maximum two 90 degree bends between draw points. No box is to be buried.
- 11 Contractor to confirm every fan hook and light point on site with the client before concreting, and to re-draw all fish wires within one week of the pour.
- 12 Task lighting, being under counter, wardrobe, mirror and desk lighting, is not part of this scope. Switching, socket outlets, distribution boards and air conditioning are covered by separate drawings.

LEGEND

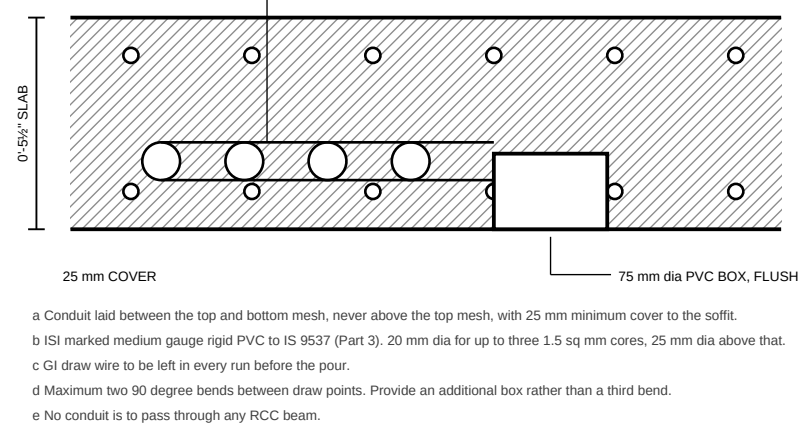

-  LED SURFACE PANEL LUMINAIRE, CEILING MOUNTED
Ref Lxx. Wattage and type to luminaire schedule, sheet 02
-  BLDC CEILING FAN ON HOOK CAST IN SLAB
Ref Fxx. Broken circle indicates blade sweep
-  ARCHITECTURAL BACKGROUND, SCREENED
Indicative only. Refer architect's drawing ECS __/AR/R2
-  SETTING-OUT DIMENSION TO FITTING CENTRE
Measured from inside face of north and west walls of that room

1 FAN HOOK CAST INTO SLAB

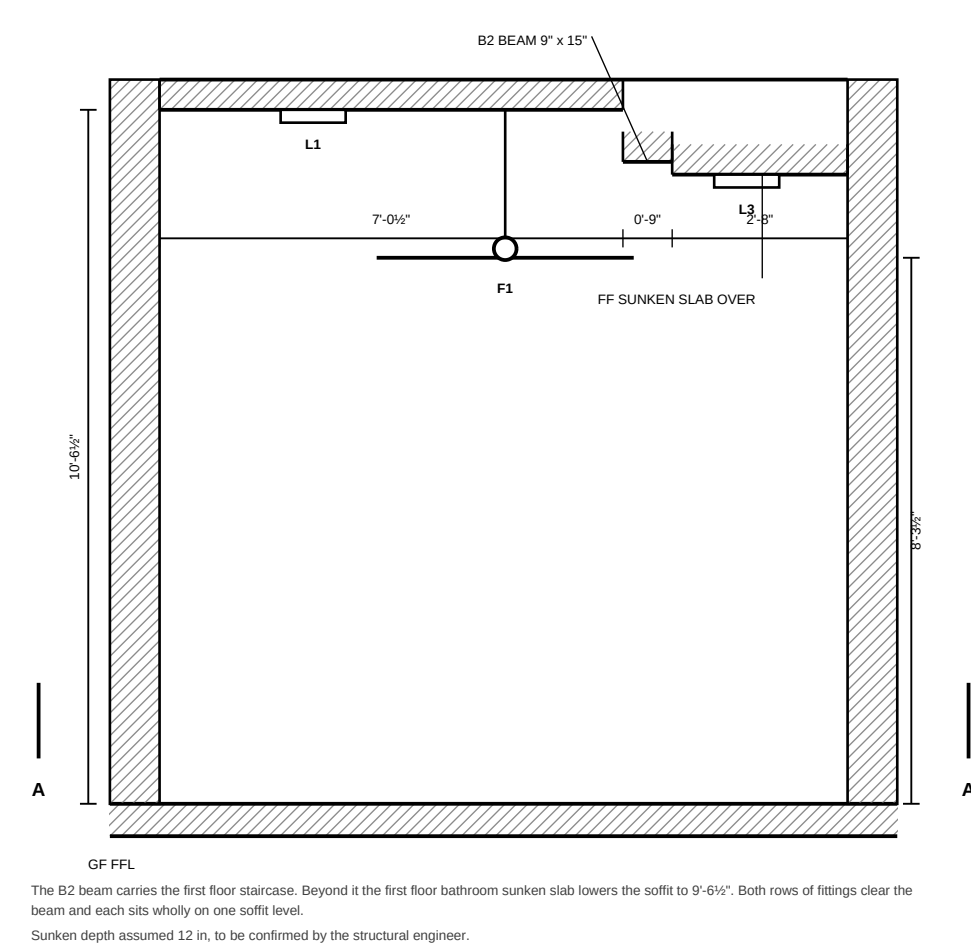

- a 10 mm dia MS bar bent as a closed loop, hooked over two bottom mesh bars in each direction.
- b Tie at all four crossings with 18 SWG binding wire. A hook tied to a single bar is not acceptable.
- c Loop to carry 100 kg static minimum.
- d Set out and fix before the top mesh is laid.

2 CONDUIT AND JUNCTION BOX IN SLAB

- a Conduit laid between the top and bottom mesh, never above the top mesh, with 25 mm minimum cover to the soffit.
- b ISI marked medium gauge rigid PVC to IS 9537 (Part 3). 20 mm dia for up to three 1.5 sq mm cores, 25 mm dia above that.
- c GI draw wire to be left in every run before the pour.
- d Maximum two 90 degree bends between draw points. Provide an additional box rather than a third bend.
- e No conduit is to pass through any RCC beam.

1. LUMINAIRE TYPE SCHEDULE

All luminaires surface mounted on the RCC soffit, driver integral. Minimum CRI 80, and 90 in the kitchen and bathrooms.

TYPE	DESCRIPTION	RATING	OUTPUT	CCT	IP	QTY	LOCATION
A	LED surface panel luminaire	15 W	1500 lm	3000 K	IP20	9	Bedroom 02, Entry / Lift Lobby, Master Bedroom
B	LED surface panel luminaire	18 W	1800 lm	3000 K	IP20	6	Dining, Hall (Living)
C	LED surface panel luminaire	22 W	2200 lm	4000 K	IP20	4	Office / Study
D	LED surface panel luminaire	18 W	1800 lm	4000 K	IP20	4	Kitchen
E	LED surface panel luminaire	15 W	1500 lm	4000 K	IP44	5	Common Bath, Handwash / Powder, Master Bath 01, Utility
F	LED surface panel luminaire	24 W	2400 lm	3000 K	IP54	2	Portico (covered car park)

2. CEILING FAN SCHEDULE

BLDC motor with integral RF remote receiver. Blade level held at 8'-3½" above finished floor.

REF	ROOM	SWEEP	FROM W WALL	FROM N WALL	SOFFIT	DOWNROD	BLADE LEVEL	DATUM

Utility	2	—	30 W
Master Bath 01	1	—	15 W
Entry / Lift Lobby	1	—	15 W
Portico (covered car park)	2	1	48 W

5. NOTES TO THE SCHEDULES

- 01
- Setting out is to the centre of the fitting, measured from the inside faces of the north and west walls of the room named.
- 02
- Soffit level is above ground floor finished floor level except in the portico, where it is above the portico floor.
- 03
- Fittings marked at a reduced soffit level sit under the first floor sunken slab. Confirm the sunken depth before fixing.
- 04
- IP20 fittings are for dry interiors. IP44 is required in bathrooms, the handwash and the utility. IP54 in the portico.
- 05
- BLDC fans are controlled by their own remote. Do not fit a step type regulator on the wall plate.
- 06
- Task lighting is not scheduled here and is by others.

6. LIGHT POINT SCHEDULE

Refer drawing GF/EL/01 for locations.
